TECHNICAL SKILLS

- **Cisco Packet Tracer** – design, simulation, and implementation of LAN, VLAN, Wi-Fi, and inter-VLAN routing networks.
- **Network Troubleshooting (L1–L2)** – Diagnosing and resolving IP conflicts, DHCP issues, connectivity problems, and Layer 2 switch errors.
- **Remote IT Support** – Providing remote desktop troubleshooting using AnyDesk and similar tools.
- **Firewall Configuration (Basic)** – Self-studied FortiGate firewall setup, policy creation, management, and troubleshooting.
- **Fiber Optic Basics** – Basic knowledge of fiber optic cable (FOC) termination and installation (self-studied).
- **Home Network Setup** – Configuration of DNS, DHCP, static IP, MAC filtering, and port filtering.
- **Hardware & Software Troubleshooting** – Repair and diagnostics for PCs, laptops, and Arduino/microcontroller systems.
- **IT Support & End-User Assistance** – Support for computers, printers, kiosks, and Microsoft account-related issues.
- **Server & Network Services** – Exposure to Active Directory, printer sharing, and basic server management.
- **Basic Web Development & Database**

TECHNICAL EXPERIENCE

ON THE JOB TRAINING - OJT
Camaya Coast
2024

- Delivered L1 and L2 technical support to end-users for computers, laptops, printers, kiosks, Microsoft accounts, IP cameras, and CCTV systems.
- Troubleshot IP-related issues (IP conflicts, DHCP problems, connectivity loss) and Layer 2 switch issues in a live network environment.
- Performed network diagnostics and basic Layer 3 troubleshooting to quickly resolve connectivity problems and minimize downtime.
- Conducted independent IT support tasks and maintenance, demonstrating reliability and problem-solving skills in a real-world operations setting.
- Gained practical hands-on experience in network troubleshooting and infrastructure support, contributing to the daily stability of the Company's IT systems.
